

An abstract, monochromatic background featuring a person's silhouette standing in a doorway or hallway. The scene is rendered in a painterly, textured style with various shades of gray and white, creating a sense of depth and atmosphere. The person is positioned in the center-right, looking towards the left. The overall composition is vertical and artistic.

# Boundless Imagination

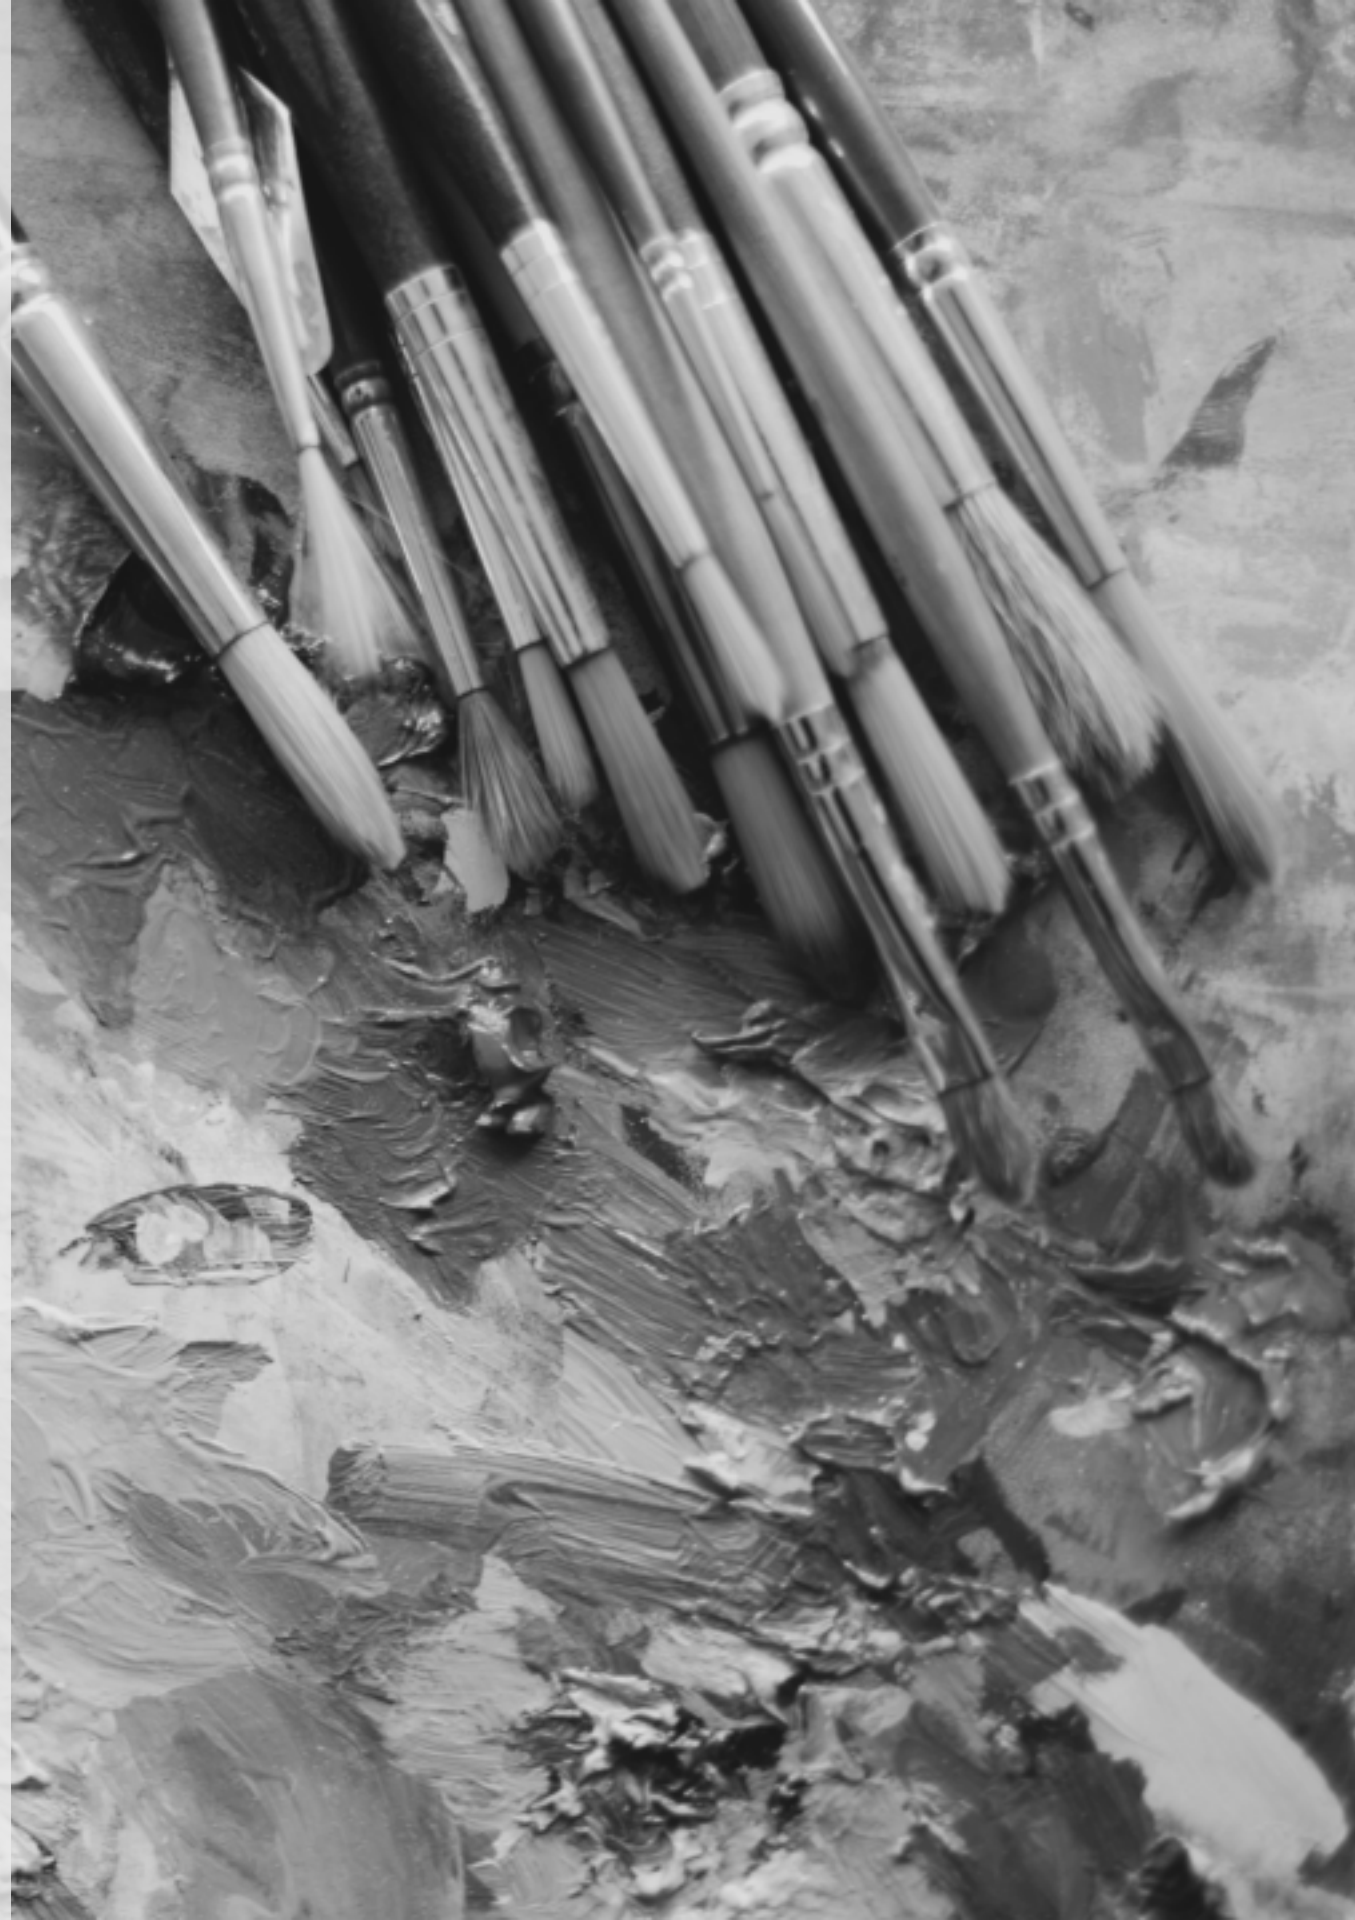

Imagine a journey where boundless imagination meets the precision of a master craftsman. This tale unfolds through the medium of brushwork, where each deep, rich hue tells a story of raw creativity.

## *Brushstrokes of Inspiration*

In a studio brimming with creative energy, we embarked on a journey where precision met spontaneity. With boundless imagination as the guide, we wove a tale of raw creativity. Each stroke of the brush is dance, capturing the dynamic interplay on the canvas. The brushstrokes themselves seemed to breathe life into the canvas, telling a story of an artist's inner world—a world where raw emotion & careful thought co-exist.

This tale of brushstrokes is more than a visual experience; it's an inspiration. It reminds us that creativity often thrives in the balance between control and freedom. The artist's journey, marked by every deliberate and spontaneous brushstroke, invites us to embrace our own creative potential. Whether through art, writing, or any form of expression, we are encouraged to let our imaginations run wild and to see the beauty in both precision and unpredictability.

In the end, the canvas is not just a collection of brushstrokes; it's a window into the artist's soul. It inspires us to find our own stories in the lines we draw and the marks we make, and to let those stories unfold in the most authentic and beautiful ways possible.

### Future Value

Simple  $A = P + I = P(1 + r)$

$A = P + Prt$   
 $A = P(1 + rt)$

Ex:

Invest  $P = \$500$   
at  $5\%$  for  
10 years

$A = 500 + 500(0.05)(10) = \$625$

Final Value:

Simple Interest

Debt, too:

You borrow \$40,000  
at 12% interest.  
You'll pay it back  
8 years later... at once.

$P = 40,000 \quad r = .12 \quad t = 8$

$A = 40,000 + 40,000(0.12)(8)$   
 $= \$64,000$

### Present Value

$P = \frac{A}{1 + rt}$

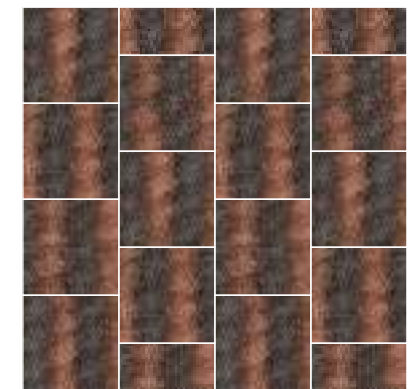

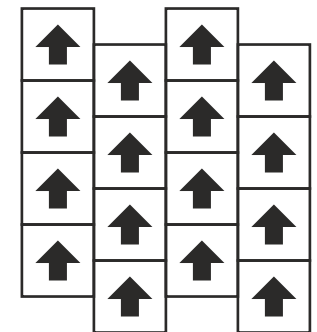

What present amount  
could I turn into  $A$   
at that rate  $r$  over  
time  $t$ ?

Ex: I offer you \$1000 in  
a year. You can invest  
your current cash at  
5%. What is the  
present value of the loan?

$P = \frac{1000}{1 + (0.05)(1)} = \frac{1000}{1.05} = \$952.38$
